Welcome to The

WORLD OF JOLLY

Welcome to The World of Jolly

It's amazing how the last couple of years have reshaped our world's reality. At Jolly, we took this time to reflect, adapt and realign our operations to suit the changing needs of our customers. As a result, we came up with new product ranges that combine innovation, functionality and cutting edge design aesthetics. All of which were received with overwhelming support and encouragement from you, our customer!

At Jolly, our manufacturing goals and techniques are optimised, so as to debut world design techniques in India whilst staying committed to our country's Make in India campaign. Our 2022 product catalogue is a testament of our dedication to fine quality, and to ensuring that we present best in class furniture fittings to you.

Our ever-growing product line has been expanded to include premium products such as Door Buffers, the L-Shaped Hinge with Lock, Door Stoppers, Tandem Box and Soft Close Drawer Slides for automatic cabinet door closure, making us a one-stop shop for all your quality-driven fitting requirements.

In 2021-22, premiering in the Indian market for the first time, the House of Jolly proudly presented a line of exquisite finishes like Matt Black, PVD Gold, and PVD Rose Gold on our hardware. These finishes bring a whole new level of refreshing sophistication to what can otherwise be a relatively staid and standard product line. Aside from their exceptional looks, PVD finishes also enhance product lifespan by decades while looking brand new, even with heavy use.

It is and will always be our endeavour to break new ground, whether in terms of product design or function and present new forms and finishes worthy of adorning the most stylish residential and commercial spaces across the nation. In terms of quality and standards, we at Jolly strive to meet and surpass the international and national standards that can support the biggest projects with unmatched quality, reliability and design.

With this, we wish you a great experience as you explore the 'World of Jolly'!

Regards,
Jolly

About Jolly

Since its inception, the House of Jolly has worked relentlessly at setting industry standards with quality intensive and design-centric products that make Indian homes beautiful and sturdy. It all began in 1944 when our founder manufactured the humble hinge.

However, that merely marked the beginning of many firsts pioneered by the House of Jolly. Always at the helm of industry trends, Jolly has always been the first to adopt global standards in manufacturing processes and techniques to craft products that are proudly 'Made In India'.

By 1984, Jolly was the only brand using cutting-edge German machinery to produce high-quality products that were at par with international industry standards.

At the turn of the millennium, in the year 2000, Jolly began exporting our world-class hinge to multinational brands across the world. Soon, in 2004, Jolly revolutionised the Indian hardware industry by introducing the stainless steel hinge

Today, Jolly has realised its vision to become the most preferred builder's hardware brand in India. We are determined to continually strive to retain this position by providing premium quality products at competitive prices.

Jolly is on a continuous mission to innovate using cutting-edge technology and create perfection and delight for clients. We strongly believe in crafting memorable experiences to create long-lasting customer relations.

Some of the high-quality, revolutionary products from the House of Jolly include: Hinges, Mortice Handles, Auto-closing Hinges, Ball Bearing Slides, Tower Bolts and all door hardware accessories that Jolly produces.

Since 2008, Jolly has, annually, expanded its product line by manufacturing seamless single-piece tower bolts, the L-type hinges with a perfect 90° bend in stainless steel, a wide range of Mortice Handles with 26 designs in multiple finishes, furniture locks, ball bearing slides, door hardware accessories and much more

Jolly has now emerged as a one-stop-shop for all builders' hardware and interior solutions - from Door Hardware, Window Hardware to premium furniture fittings.

In 2021, we further optimised our operations to garner a greater market reach that expanded pan-India, and soon launched two new

product lines: Maranello and Arrow. With our three brands, Jolly, is now one of the top builder's hardware brand with a Pan Indian presence.

Your safety is our topmost priority which is why at Jolly we only use the best quality stainless steel in the industry. For example, our hinges apart from being fire safety certified, also last you a lifetime of hassle free performance.

At Jolly manufacturing processes here are focused on solemnly delivering the best quality products with high functionality and exceptional looks, that you simply 'Fit and Forget'.

Our Legacy

1944

We had promises to keep. In 1984 we became the first brand in India to manufacture world class hinges on entirely automatic German technology.

Jolly[®]
Since 1944
JUST FIT & FORGET

2000

In 2000, our hinges left the Indian shores to the world's leading multinationals.

2002

In 2002 we introduced stainless steel hinges with a superior quality and everlasting durability & revolutionized the future of hinge making.

2008

In 2008 we made a stir with our single piece tower bolt in stainless Steel with the pledge of creative innovation in design.

2012

In 2012, we introduced the L-type hinge with a sharp 90° bend in stainless steel. We challenged the word impossible through constant learning & innovation.

2014

In 2014, we introduced an array of mortice handles with the artistry that elevated door handle's repute as furnishing accessories for doors & decors.

2016

In 2016, we set foot in the world of furniture locks. Jolly's slim, elegant yet robust locks were received with a warm response.

2017

In 2017 we engraved another milestone by introducing ball bearing slides, manufactured in our automatic plants. The smooth function made an autograph style.

2018

In 2018 we introduced the PVD coating on our sophisticated mortice handles for the first time in the country. This year again we pioneered the highly luminous PVD coated finish on the tower bolt, created from a single metal piece.

2019

In 2019, we redefined the world of designer cabinetry with a range of smooth and self-closing cabinet hinges and drawer slides.

2020

In 2020, we introduced the Cubo tower bolt, crafted out of a single metal piece with an unmatched smooth movement and durability.

2021

2021, we proudly presented maranello, our premium range of exquisitely crafted, mortice Handles, hinges and accessories. They are pure art work for the doors. This year we created India's first sleek cylindrical Tower Bolt, and revised our range of Hinges with lustrous PVD coated finishes.

A Legacy That Was Proudly Made In India

The House of Jolly was founded in 1944, with the long-standing vision of a self-reliant India.

Since then, with each new product, Jolly continues to add to the nation's manufacturing and skilled labour capabilities.

Bringing the best of global manufacturing techniques, for the first time in India,

Jolly, under the tutelage of its founder Pt. Sh. Jeetendra Nath Bhargava and his successor, have pioneered the Atma Nirbhar Bharat vision, since its inception

We stand proud and continue to build towards our commitment to building India, one door, one hinge and one perfect fitting, at a time.

*Open the door to a world of...
seamless opulence*

~ House of Jolly

Sh. Rajesh Bhargava

CEO

Sh. Rajesh Bhargava is the driving force behind the house of Jolly.

Founded by his father in 1944, Rajesh took over Jolly at a young age after the passing of his father. A first-year engineering student at that time, young Rajesh took upon the responsibility to establish the legacy his father left behind whilst pursuing his full-time Engineering Degree from Delhi College of Engineering.

An alumnus of St. Columba's School, Delhi, Rajesh Bhargava attributes his adherence to discipline to his mother. Having dedicated his life's work at Jolly for half a century, Rajesh Bhargava is as driven today, as he was when he first joined the family business. His biggest source of inspiration to this day continues to be his late father, whose principles, actions and words resonate and serve as a guiding light to this day.

Fueled by his passion to improve his products, young Rajesh's quest was to create a niche for Jolly. His mantra of 'when you seek perfection, there is always a vacancy at the top' has been the principle force behind countless innovations at Jolly. This attention to detail and his unrelenting dedication is the reason why Jolly's products are hard to replicate by their industry-peers.

Aditya Bhargava

Director

Aditya, a pedigreed businessman, is at the helm of strategy and operations at Jolly. Finding his core strength in meticulous research and setting stringent processes, Aditya is the man behind Jolly's hallmark product quality.

Backed with an engineering degree from MIT Pune and an MBA from Cardiff Business School, Aditya has worked with TATA Motors in the past and gained invaluable experience and insights from his experience there.

Today, operating with a disciplined work ethic, Aditya is constantly inspired by his father, who is an absolute visionary and the organisation's guiding force.

Aditya envisions for Jolly to set industry standards and become a name etched in the history of India's infrastructural growth and development.

Akshay Bhargava

Director

Akshay, an innovator par excellence, drives the organisation's research and development teams. Inherently industrious, Akshay seeks to introduce the subcontinent's market to the highest realms of luxury in hardware design and functionality.

An engineering graduate from Amity IP University, Akshay is an MBA from S. P. Jain Institute of Management and Research, Mumbai, and holds a certificate in Digital Marketing from XLRI.

Within his two decades of industry experience, Akshay has been instrumental in making Jolly India's most sought-after hardware brand.

He now seeks to take the organisation global by beginning expansion in the neighbouring countries of South Asia and conquering their markets with Jolly's bespoke quality products, as well.

Chandni Bhargava

Director

Over the last decade, Chandni has focused all her energy on building the brand 'Jolly'. Her efforts to showcase the exceptional design, quality, and craftsmanship of every Jolly product ever produced have yielded pan-India, industry-wide acclaim.

A mother and a businesswoman, Chandni is unrelenting in her efforts toward realizing the vision of making Jolly a household name.

Having completed her BBA from Amity University, Chandni then did her MBA from Cardiff Business School.

A self-driven, highly motivated businesswoman, Chandni plans to take Jolly to new heights through strategic brand positioning and partnerships.

Sheetal Bhargava

Director

The most recent entrant to Jolly, Sheetal joined the family business in 2021. Sheetal looks after the brand, Maranello, which deals with high-end, intricate and ultra-luxurious handles. A young mother and a Dentist by qualification, Sheetal brings a fresh yet methodical perspective to Jolly. Her area of focus includes growing Maranello and Jolly to new heights by introducing jaw-dropping designs inspired from cultures all over the world. Sheetal also wants to bring visibility to diverse Indian design styles crafted for the sensibilities of luxury and art connoisseurs alike.

Sheetal also wants to focus on shaping Jolly's work culture by creating inclusivity, empowerment and ownership across all levels to create a deeper level of employee engagement and satisfaction.

6 Hottest Trendsetters

NextGen Hinges!

Electroplated Stainless Steel Hinges

Another first in India, from the House of Jolly. Classifications

3H700E6PC10

Our products conform to the International chemical & physical tests as listed below:

- Single rub acetone test - 2500+
- Pencil Hardness - 4h+
- Natural Salt Spray Test ASTM B117 - 500 Hrs+
- Abrasion Test - 18 + Litres Sand (As per ASTM 986 Ottawa Sand)
- UV Light Resistance
- Sweat Test (A SN/BHMA Test + USA Specification) 4+

Hinges

Product Technical Specifications

Selecting the Right Hinges for Your Requirements

Product Technical Specifications

Jolly is synonymous with architectural hinges, in fact, Jolly is the industry's premier designer and manufacturer of architectural hinges. Our range of hinges offer the widest varieties of sizes, shapes and finishes, all of which not only meet but exceed ANSI standards. Jolly's products are known for their legendary quality and time-tested durability that enable in their consistently superior performance. If you're looking for a brand you can trust, look no further than Jolly.

Criteria for hinge selection:

- **Door Weight and Size**

Characteristics of the door such as its weight and size are considerations that need to be taken into account for accurate hinge selection, as they directly impact the longevity of the product

- **Door Usage**

We should consider the expected usage pattern of the door - for instance, the frequency at which the door is likely to be used

- **Door Accessories**

The weight of all door accessories such as the door closer, handle and door stopper need to be factored in when selecting a hinge.

Our products abide by the following standards:

- DIN EN 12209: 2004 - 03 Euro profile Mortise
- Lock 24 mm (Backset 50/55/60/65/70 mm)

Classifications

3H700E6PC10

Our products conform to the International chemical & physical tests as listed below:

- Single rub acetone test - 2500+
- Pencil Hardness - 4h+
- Natural Salt Spray Test ASTM B117 - 500 Hrs+
- Abrasion Test - 18 + Litres Sand (As per ASTM 986 Ottawa Sand)
- UV Light Resistance
- Sweat Test (A SN/BHMA Test + USA Specification) 4+

Determining The Weight of A Door

Door weight & size reference guide

The weight of a door depends on the size and the material used for making the door. This would include the weight of the door's accessories installed on the door such as its handle, door closer etc.

Only once the weight and weight duty of a door is determined, can we identify the hinge size. The table below shows the mass of a typical door, use it to identify the Duty or Load-Bearing capacity of your door.

Door Type	Door Type	Mass (Kg)	Duty
Cupboard Wardrobe, Cabinet, Louvred doors and shutters	2,040 x 626 x 40	3.0 - 10.0	Light
Light Internal Large wardrobe and Large Louvred Doors	2,040 x 926 x 40	10.0 - 17.5	Light
Medium Internal Doors	2,020 x 1,012	17.5 -25.0	Medium
Heavy Internal Doors	2,040 x 1,012 x 40	25.0 - 37.5	Medium
Heavy Internal Doors	2,040 x 1,012 x 40	40.0 - 60.0	Heavy
Oversize or Special External Door	2,040 x 1,200 x 40	55.0 - 110.0	Heavy

Assessing Door Usage in High Usage Volume Scenarios

The next step in selecting the right hinge for your door is to assess its likely usage. Failure to identify the frequency of a door's operations can lead to incorrect specifications and the subsequent use of inadequate hinges, which may cause ensuing problems.

Here are some reference ranges for high door usage scenarios in a commercial or public setting:

Door Type (High use/High duty situations)	CYCLES (per day)	CYCLES (per annum)
Large Department Store Entrance	5,000	1,500,000
Large Office Building Entrance	4,000	920.000
Cinema or Theater Entrance	1,300	455.000
School Entrance	1,250	225.000
Entrance Door to School Toilets	1,250	225.000
Shop Entrance	1,000	300.000
Large Bank Entrance Door	1,000	250.000
Corridor Fire Door	600	108.000
Bank Entrance	500	150.000
Restaurant Entrance	500	150.000
Large Office Corridor Entrance	450	104.000
Large Shop Entrance	400	120.000
Large Office	400	92.000
Factory Toilet Entrance or Hospital Ward Door	350	128.000
School Classroom Door	80	15.000
Office Door	75	18.000
Store Toilet Door	60	18.000
Large Villa Front Entrance	12	4.400
Large Villa Rear or Side Door	15	5,400

Door Installation

How to Determine The Correct Number of Hinges

Below is a general rule of thumb when it comes to determining the number of door hinges during door installation:

<i>Door Height</i>	<i>Number of Hinges</i>
Up to 70”	3 Hinges
Over 70” and not over 90”	4 Hinges
Over 90” and not over 120”	5 Hinges

For Extra-Wide Doors:

In cases where doors have a width greater than 37” and upto 48”, adding an extra hinge will provide it the requisite additional strength. The extra hinge supports the additional weight and tension applied to the frame created by the wider door width.

Determine The Position of Hinges

The below recommendations are only a reference guide and vary according to door specifications:

Figure 1

For medium weight doors-
this will ensure that the
door holds straight and does
not warp.

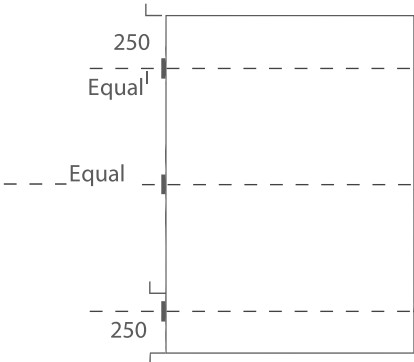

Fig.1

Figure 2

For higher weight doors - this
alternative is recommended when
a door-closing device is fixed on
the door.

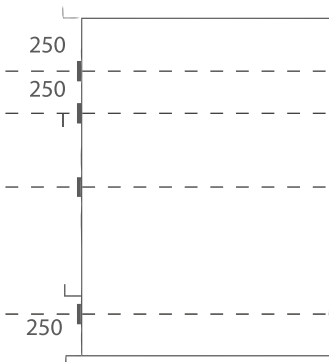

Fig.2

Figure 1

For doors with a height over
2.100 mm -this solution is
applicable for constructions that
have a high risk of door warping

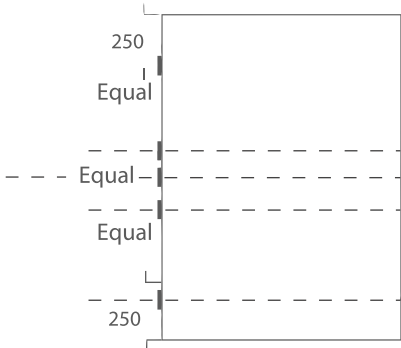

Fig.3

Figure 2

For doors with a height over
2.100mm- this version is especially
recommended when door closers
are fitted on the door.

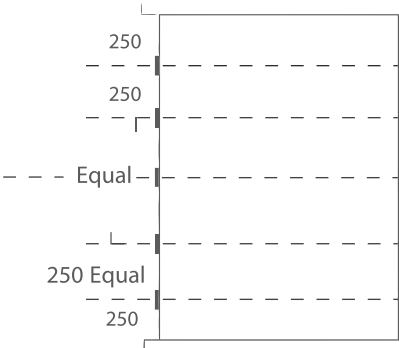

Fig.4

Hinges | Care and Maintenance

For optimal functioning, care should be taken to ensure that hinges are free swinging without any binding. Jolly recommends the use of shims to align hinges for satisfactory results.

Hinges should be well-greased and checked on a regular basis for lubrication.

We recommend that hinges used in commercial, high frequency applications, or those in extreme environmental conditions (extreme heat or near salt water), get lubricated annually to ensure quiet operation and a long product life cycle.

Finishes Available In Our Product Range

The World of Jolly presents best-in-class furniture, window and door accessories in 11 stunning finishes. Our top-of-the-line plating and coating methods meet and exceed industry standards, in addition to matching the design demands of top interior designers across India. The wide range of finishes from the House of Jolly add longevity to the hardware whilst keeping their shine and brilliance intact.

Key Systems

When you order multiple locks for an entire house or commercial space from Jolly, you have options to order locks in two formats: A Common Key System and A Master Key System.

A Common Key System

This system is available for multiple locks based on your requirement. The Common Key System is a single common key that unlocks multiple doors bearing identical locks. This system is ideal for commercial building campuses that require frequent access for multiple personnel.

Benefits of a Common Key System

A common key system helps with the management and control of a security system applied to the mechanical keys used in a building or across a specific site. It enables high frequency access that needs to be granted to multiple personnel.

Examples:

Toilets, Ducts, Service rooms

A Master Key System

What is a Master Key System?

A Master Key is a key that can operate all the distinct locks in a predefined set. Each of these locks are also operable with their individual (change) keys.

Its benefits include:

Tight security without the confusion of multiple keys.

It is easy to define and map the access of personnel. Thus, simplifying the security system within a work group.

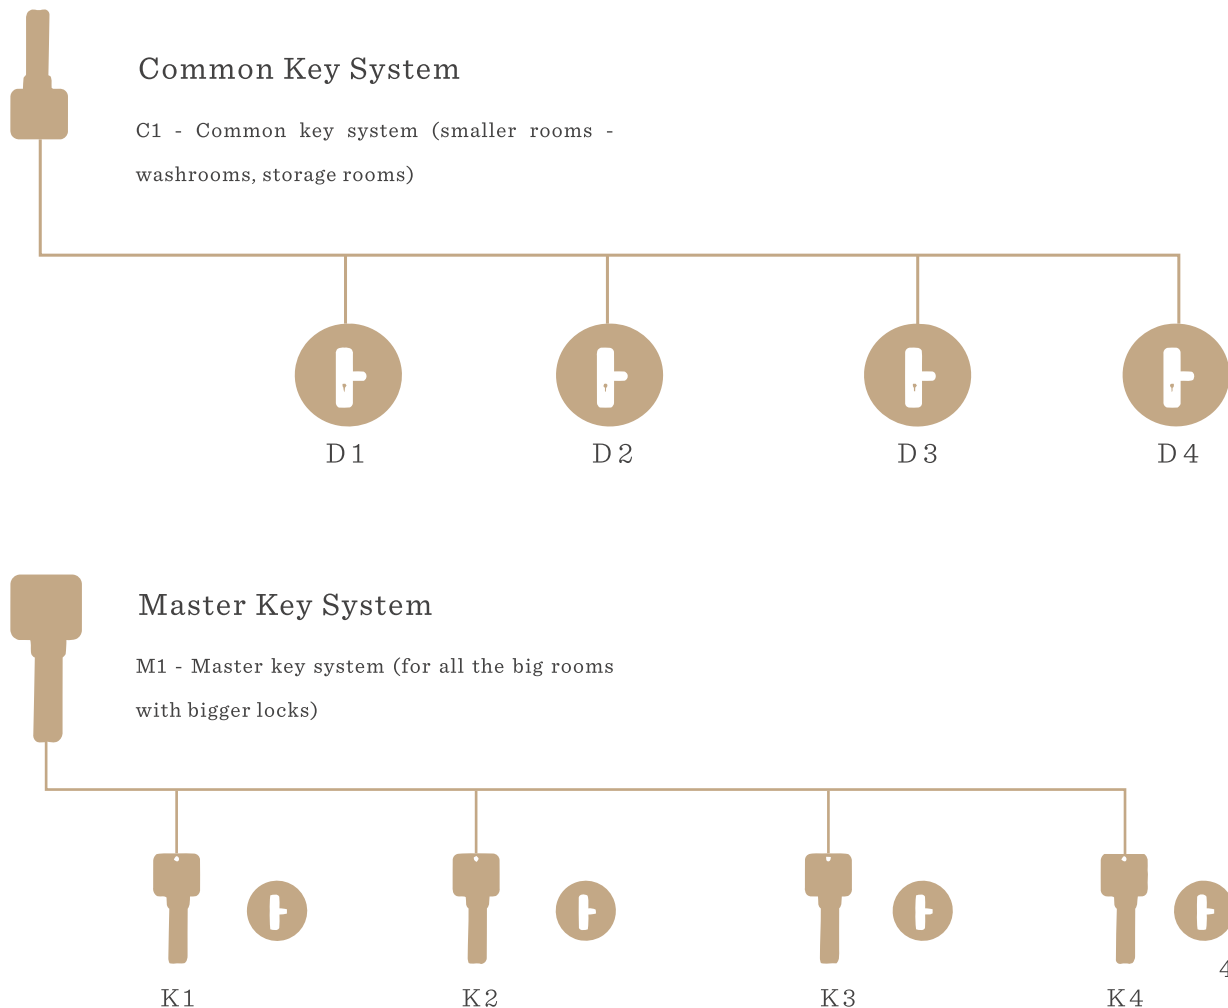

Master Key Arrangement

The system consists of locks which are fitted on various application areas (D1,D2 ..)

Each key is operated by an individually assigned key. (K1, K2 ..) previously referred to as a change key.

The Master key supersedes all the change keys and can be used to open all the locks in the given systems.

Examples: Floor Wise Master Key System

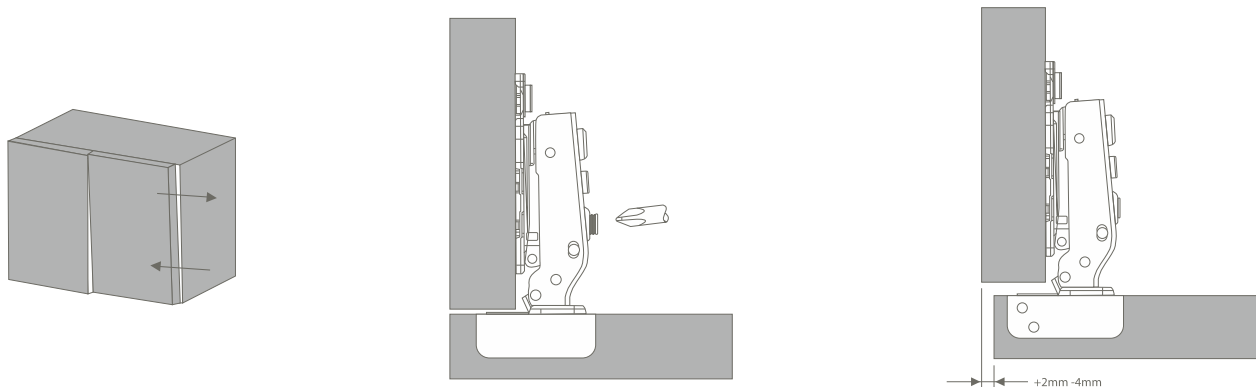

Assembly & Installation of the Auto-Closing Hinge

Hinge Adjustments

Side Adjustments

Side adjustments to the door are made by using the indicated screw.

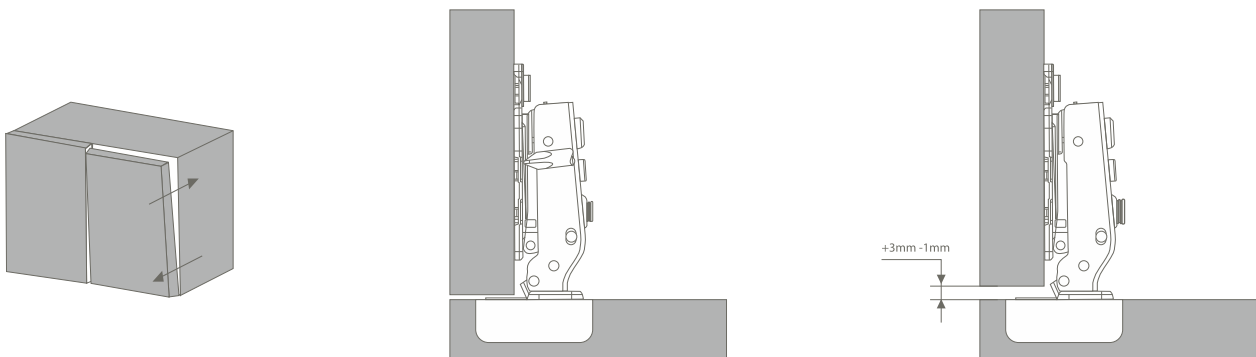

Depth Adjustments

The depth of a cabinet door can be adjusted without loosening any screw. The door can be moved in or out by rotating the cam adjuster on the hinge arm.

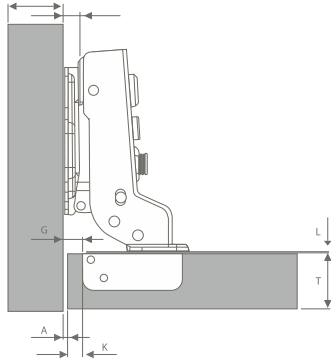

Height Adjustment

Similarly, height adjustment to a cabinet door can be made without loosening any screws. The door can simply be moved in or out by rotating the cam adjuster on the hinge arm.

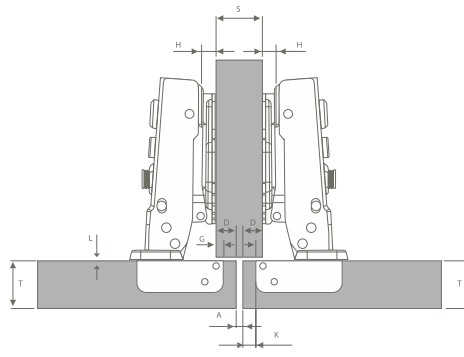

Applications

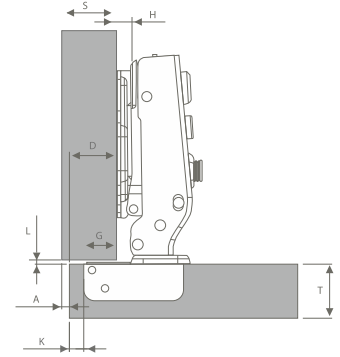

Full overlay door

Half overlay door

Insert door

Hinges Product Catalogue

Stainless Steel L-Type Hinges with Locking Mechanism

Jolly's Stainless Steel L-Type Hinge with its optimised locking mechanism conveniently prevents your open cabinet doors from swinging arbitrarily.

This revolutionary hinge was first launched and manufactured in India by the house of Jolly. Its production in India is a nod to Jolly's engineering expertise. The perfect 90° bend on stainless steel is what enables cabinet doors to stay open at a right angle, protecting your cabinet doors from damage caused by repetitive use.

The locking mechanism of this hinge prevents wear and tear of your cabinet doors giving them a long life

Available in 24 size variants.

Another first by the house of Jolly, in India.

Key Cylinders

Secure your space with the finest quality and craftsmanship since 1944.

Normal Key Cylinder | Half Cylinder | Computer Cylinder

Regular Key Cylinder

Jolly's Regular Key Cylinder is created from an acutely precise process that uses automated steps to create high security locks and keys. Made with a combination of brass and zinc, Jolly's Normal Key Cylinders are par excellence and come in a range of variants to match your security needs.

Regular Key Cylinder

The OSK or One Side Key Cylinder as the name suggests, locks from one side and can be unlocked with a turn of the knob from the inside. Best used for moderate security needs such as storerooms, washroom doors and smaller internal doors and front doors.

The BSK or Both Side Key Cylinder ensures controlled access from both sides as it can be locked from either side of the door, providing dual security. Best used for providing additional security for doors such as balcony doors and bedroom doors.

Computer Key Cylinder

The Computer Key Cylinder is made from a high precision, automated process with custom key cutouts created for each pin cylinder based lock. This is ideal for securing doors that require high-security, such as main entrances or back doors in commercial or residential buildings.

Computer Key Cylinder

The One Side Key Cylinder lock comes with a set of 4, irreplicable, computer-generated keys for added security. It secures the doors from one side, which makes it ideal for storage rooms that require restricted access in commercial or residential buildings.

The Both Side Key Cylinder lock is versatile in its uses for entry-ways, back-doors, storage rooms and more. It comes with a set of 4, irreplicable computer generated keys for enhanced security. The BSK can be operated from both sides and has a number of versatile applications in commercial and residential settings.

Handle Crafting Process at Jolly

A behind the scenes peek into how Jolly's masterpieces are crafted.

Design

1

The idea for a new design first takes form on paper with a detailed graphic blueprint of its design and function.

3D Design/ Rendering

2

A 3D design blueprint is created using design software.

Plastic Print/ 3D Print

3

The design is 'printed' using a 3D printer to make a plastic model of the concept.

Wooden Model

4

The idea for a new design first takes form on paper with a detailed graphic blueprint of its design and function.

Die-casting tools are made

5

From this wooden shape, the mould or die-cast for the handle is custom made.

Forging The Shape

6

The raw metal is then forged into the ideal shape of the handle and base.

Trimming The Handle

7

The rough looking metal parts are then trimmed for a better finish. This is where different finishes such as Satin or Matt are achieved.

Grinding

8

In this step, all the excess oxidation is removed through vigorous grinding.

Polishing

8

In this step, the nearly finished handle is polished for the brightest finish.

Coating

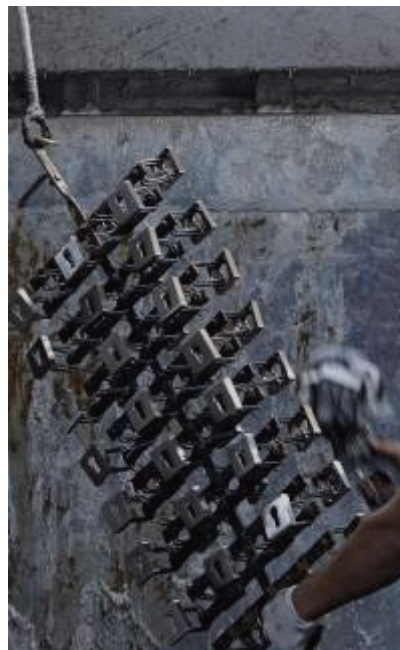

10

Depending on the desired effect, PVD coating or other coating is done on the handle to create a stunning result.

Quality Testing

11

In this step, selected Jolly handles undergo rigorous saltwater testing to ensure its high quality and durability.

Corporate Social Responsibility

Sustainability

At Jolly, our manufacturing processes incorporate sustainable practices. We have deployed a zero discharge system that ensures that all the water for industrial use is treated and reused.

We also use clean fuels like PNG in all our units. This helps reduce Carbon Monoxide emissions by 90% or more.

Women Empowerment

At Jolly, we strongly support female empowerment. Over 60% of our workforce comprises women. The culture at Jolly supports women as individuals and mothers. We support our female staff through responsible initiatives to support them on a case-by-case basis on issues related to their children's education, personal safety and empowerment, training and counselling.

At Jolly, we chase our goals of not only making India self-reliant, but its women too.

Recycling

At Jolly, our sturdy packaging is made from recycled resources. The waste materials like carton scrap, paper scrap, plastic scrap, metal scrap, that are collected during production are recycled to create sustainable packaging that protects our products, till they reach you.
